Suspend/Wall Mount/Ceiling Mount

Recess

Ceiling Mount

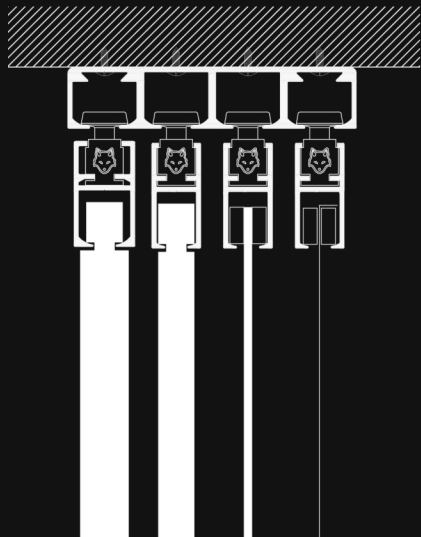

*Tracks can be suspended when connecting to PF120

Shuttle Carrier

PFB90 PFB12
Can work with a range of sizes. See brochure for details.

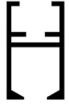

For Fabrics and materials under 5 mm thickness use our 2 strip solution for mounting your material.

Column Profile

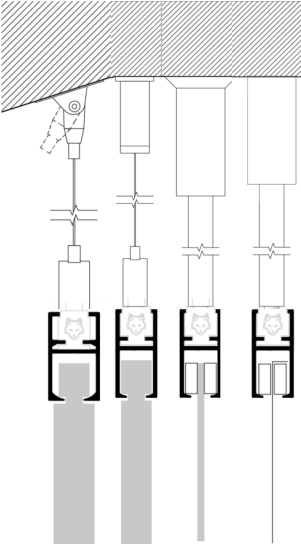

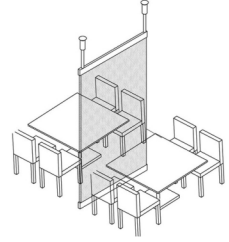

SF90

SF120

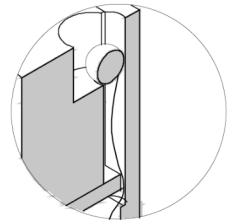

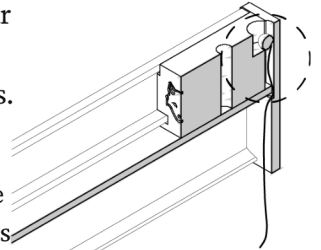

Minimum Radius 10"
 Standard Radius 10"
 No Maximum Radius

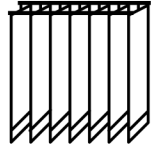

No need to build walls for your flex space and restaurants.
 Can work with a range of sizes.
See brochure for details.

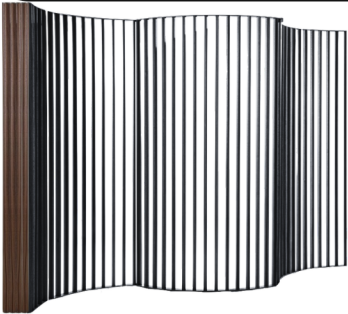

Utilize our Locke option to reduce tension on open weave materials like fish net materials helping to avoid the hourglass shape and reducing stretching in your fabric.

Gemini Profile

Minimum Radius 10"
Standard Radius 10"
No Maximum Radius

With the Gemini the power of what is seen and of what isn't seen is now under your full control redefining customer experience.

As you walk through a space your first impressions often control how you perceive everything after.

The predetermined angles of the Gemini system are unique in that they allow you to **block out what you don't want seen** like a highway or dumpster and allows you to **bring in to view the sites you want seen** like the pool, the ocean, the mountains. giving you full control of the room without anyone even realizing it you control the emotional feel of the ambiance.

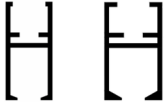

Gemini Baffle Profile

Minimum Radius 10"
Standard Radius 10"
No Maximum Radius

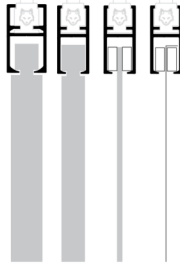

Gemini Carrier

PFB90 PFB12

Can work with a
range of sizes. See
brochure for details.

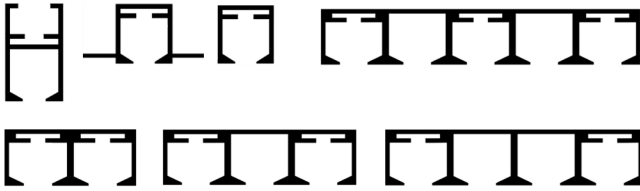

The Gemini Baffle

Great for skylights, exposed
ceilings, music studios or
just to help with the echo in
your open room.

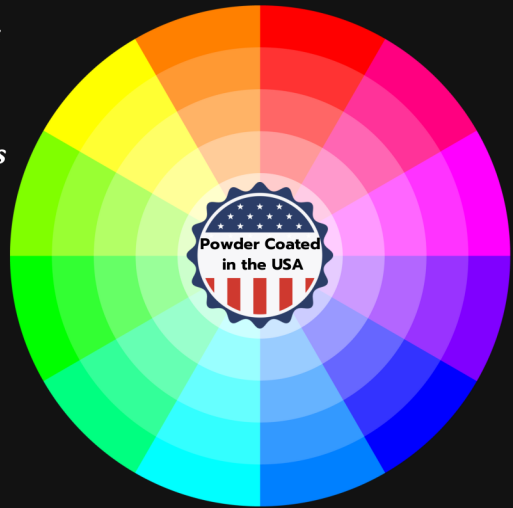

Sampson Mills

**Chameleon -
Custom Colors For All Sampson Mills Tracks**

We offer black, white, and silver as our standard color options but we understand in design there are ever-changing color schemes to match individual personalities of a space and the person calling the space home even if just for a quick stay.

With the Chameleon USA Powder coated Color options you can now order a track in a custom RAL Color for your project without any minimums.

An example of some fun pop colors we've used in past projects.

Let your imagination go wild
